CHAPTER

# 'One Voice' & Manufacturing Success Tour Tariffs, Trump, and the 2018 Campaign: An Update from Washington

Tuesday, October 30, 2018  
5:00pm  
Speedgrip Chuck Company  
2000 Industrial Parkway, Elkhart, IN 46516

Omar S. Nashashibi is a Founding Partner with The Franklin Partnership, a bipartisan lobbying firm based in Washington, D.C. Having lived in Washington for over twenty years, he has represented manufacturing associations in Washington since 2002, and is an expert on the various public policy issues affecting businesses throughout the country.

Omar has twenty years of experience working with policymakers, politicians, and the media. He lobbies the White House, members of Congress and government agencies who issue thousands of new laws and regulations each year.

## Tariffs, Trump, and the 2018 Campaign: An Update from Washington

With the 2018 midterm Congressional elections only days away, this is your chance to hear directly from a Washington insider about what is really happening and how tariffs, taxes, regulations and other developments impact your business.

Omar S. Nashashibi, with NTMA's lobbying firm in Washington will provide you a can't miss update. Unlike most politicians, President Trump is moving forward and keeping his promise to shake things up in Washington and change business as usual. Tariffs on imported steel and aluminum,

a trade war with China, and a new NAFTA are only a few of the issues dominating the headlines today.

Meanwhile, major changes are coming to how the federal government treats apprenticeships and Washington is focusing on Career and Technical Education more than ever before.

Omar is a lobbyist in Washington, D.C. having represented the NTMA's 'One Voice' for more than a decade before the U.S. Congress, White House, and federal agencies.

## Manufacturing Success Tour: Speedgrip Chuck Company

Speedgrip Chuck Company delivers premier engineered workholding solutions for manufacturers. Our products deliver the highest levels of quality and productivity for customers in every industry where metal cutting is a part of the manufacturing process. Our highly qualified and solution oriented engineering staff designs solutions which hold tight tolerances, help you make the best parts, and deliver efficiency to the manufacturing floor.
